Rural Telephony Solutions

ThurayaPAYPHONE
A Versatile Communication Solution

Thuraya satellite payphones offer a quick, reliable and cost effective means of providing telecom access to remote and rural areas.

For many communities ThurayaPayphones provide the only link with the outside world.

ThurayaPayphones provide border-to-border telecommunications across Europe, North, Central Africa and large parts of Southern Africa, the Middle East, Central and South Asia

The Payphone Solution
The Chip Card Payphones consist of:
- A payphone unit for satellite access, which is a standard chip card based unit.
- External antennas (satellite + GPS antennas).
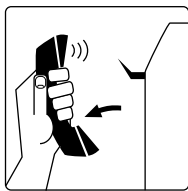

Payphone Features
- Satellite voice telephony and emergency services.
- Easy and cost effective to operate.
- Compact unit designed to withstand rough conditions and vandalism.
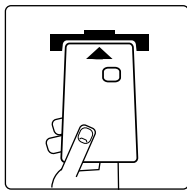

How it works...
Debit Card

A customer has the choice of using a debit card on a ThurayaPayphone. These cards of certain value purchased in advance provide the method of making calls on the ThurayaPayphones. The chip cards come in three different denominations namely 10, 15 and 25 Units. They are available with Thuraya Service Providers.
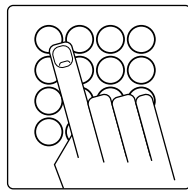

Operating Concept Using Chip-Card

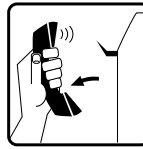

| Pick the handset | Insert the chip-card | Dial the number |

"Call For All"

For people who wish to maintain independent billing from the Payphone account can use "**Call For All**" cards on ThurayaPayphones for their communication needs. "**Call For All**" allows the caller to communicate without leaving a balance on the ThurayaPayphone SIM account.

### Operating Concept Using "Call For All"

| Pick the handset | Dial 155 (English) Dial 156 (Arabic) Dial 157 (En François) | At the voice prompt, enter PIN Number | Follow voice instructions to enter your destination number (country code+area code+number) followed by # (Do NOT dial "00") |
